**Purpose of visit:** To moderate EYFSP scores for children in the reception cohort in order to ensure that judgements are accurate and consistent with national exemplification.

Staff know the children very well and could talk about them confidently. All evidence provided, either verbal or recorded supported the judgements that had been made and judgements were agreed as being accurate and in line with exemplification.

It was agreed that evidence was available to support one child having attained exceeding in all C&L strands as opposed to expected and this was recorded on the documentation. Both moderators and the teacher agreed the change.
