

# Knowledge Mat: Science from field to table

## Subject Specific Vocabulary

agriculture	the science of farming
crop	a cultivated plant grown on a large scale
harvest	the process of gathering in crops
process	a series of steps to achieve something
wheat	a cereal used in bread making
flour	a powder made by grinding grain
grinding	rubbing things together to make smaller pieces

## Key Knowledge

Farmers grow crops which we then eat. Mostly the crops are changed so that we can eat them. For example: We do not eat wheat straight from the field. It is harvested, then milled to change it into flour.
